

## ACTIVATED CARBON ABSORPTION MEDIA INDEX

The following list of substances demonstrated excellent removal efficiencies using Activated Carbon.

Acetic acid	Dipropyl ketone	Octalene
Acetic anhydrite	Epichlorhydrin	Octane
Acrylic acid	Ethyl acrylate	Octene
Acrylonitrile	Ethyl benzene	Organic chemicals
Adhesives	Ethyl bromide	Ozone
Alcohol	Ethyl mercaptan	Paint odours
Amyl acetate	Ethyl silicate	Palmitic acid
Amyl alcohol	Ethylene chlorhydrin	Paradichlorbenzene
Amyl ether	Ethylene dichloride	Paste and glue
Aniline	Euclyptole	Pentanone
Asphalt fumes	Freon 11	Perchloroethylene
Benzaldehyde	Freon 12	Pesticides
Benzene	Freon 113	Phenol
Bromine	Gasolene	Pitch
Butanone	Heptane	Propionic acid
Butyl acetate	Heptylene	Propyl acetate
Butyl alcohol	Iodine	Propyl alcohol
Butyl cellosolve	Iodoform	Propyl chloride
Butyl chloride	Isophorone	Propyl ether
Butyl ether	Isopropyl acetate	Propyl mercaptan
Butylaldehyde	Isopropyl chloride	Putrescine
Butyric acid	Isopropyl ether	Pyridine
Coproaldehyde	Kerosene	Resins
Caprylic acid	Liquid fuels	Rubber
Carbolic acid	Lubricants	Sewer odours
Carbon disulphide	Menthol	Skatole
Carbon tetrachloride	Mercaptans	Smog
Cellosolve	Mesityl oxide	Smoke
Cellosolve acetate	Methyl butyl ketone	Stoddard solvent
Chlorobenzene	Methyl cellosolve acetate	Styrene monomer
Clorobutadiene	Methyl cellosolve	Sulphur compounds
Chloroform	Methyl chloroform	Tar
Chloronitropropane	Methyl methacrylate ester	Tetrachloroethane
Cloroapicrin	Methyl ethyl ketone	Tetrachloroethylene
Cigarette smoke	Methyl mercaptan	Thiophene
Creosote	Methylcyclohexane	Tobacco smoke
Cresol	Methylcyclohexanol	Toluene
Crotonoldehyde	Methyl glycol	Toluene di isocyanate
Cyclohexanane	Methylcyclohexanone	Toluidine
Cyclohexanol	Methylene chloride	Trichloroethylene
Cyclohexanone	Monochlorobenzene	Trichloroethane
Cyclohexene	Monofluoro-trichlorethane	Turpentine
Dibromoethane	Naptha (coal tar)	Urea
Dichlorobenzene	Naptha (petroleum)	Uric acid
Dichlorosfluoromethane	Napthalene	Valeric acid
Dichloroethylene	Nitrobenzenes	Valericdehyde
Dichloroethyl ether	Nitroethane	Vinyl acetate
Dichloronitroethane	Nitroglycerine	Vinyl chloride monomer
Dichloropropane	Nitromethane	Vapours
Dicyclopentadiem	Nitropropane	Varnish fumes
Diethyl ketone	Nonane	Waste Products
Dimethylsulphate		Xylene
Dioxane		Xenon delay

The following substances have good collection results with standard activated carbon.

Acentonitrile	Dimethyl sulphide	Methyl ether
Acetaldehyde	Ethyl bromide	Methyl formate
Acetone	Ethyl chloride	Nitric acid
Acetylene	Ethyl ether	Nitrogen dioxide
Acrolein	Ethyle formate	Pentane
Amines	Ethylene oxide	Phosgene
Ammonia	Flourotrichloromethane	Propionaldehyde
Butadiene	Formaldehyde	Sulphuric acid
Butane	Formic acid	Sulphur dioxide
Butylene	Hexane	Sulphur trioxide
Butyraldehyde	Hexene	Sewer odours
Chlorine	Hexyne	Vinyl chloride
Coal smoke	Hydrogen sulphide	Volatile organic compounds
Combustion odours	Hydrogen selenide	Wood alcohol
Corrosive gases	Hydrogen bromide	
Dichlorodiflouromethane	Hydrogen chloride	
Dichloromonoflouromethane	Hydrogen flouride	
Dichlorotetraflourethane	Hydrogen iodine	
Diesel fumes	Isoprene	
Diethyl amine	Methyl alcohol	
	Methyl acetate	
	Methyl bromide
